logue, of French legislation touching the welfare of wage-workers. The directness and brevity, and yet withal the comprehensiveness of the volume, are doubtless due to the apparent joint qualifications of the authors for the task. One is a professor on the faculty of law at Lyon, the other is a professor in l'Ecole d'Arts et Métiers at Châlons-sur-Marne.

The volume is entirely occupied with the present statute law of France on the subject of labor. Space does not permit a description of the contents beyond the statement that the book covers concisely every feature of the labor law and is almost entirely descriptive rather than historical or controversial. It is essentially a handbook of the same type as Stimson's, except that this volume—as would be far less necessary under the continental system—contains nothing of the judicial construction of the law. It is a book that will be indispensable to the student of labor legislation.
